Spring 2008
Collaborative Faculty Partnerships

Secondary and postsecondary educators will work collaboratively to create academic and assessment strategies that promote students’ academic success. They will work in pairs by shared content areas to develop and implement a specific project to increase students’ academic performance and critical thinking skills. They will also identify practical and meaningful assessment tools to evaluate students’ learning. These faculty members will share their results with colleagues in a variety of ways. Each participating faculty member will receive a $700 stipend for their complete involvement over a full year’s commitment.

Our Goals are to:

- Identify shared expectations for students’ success
- Increase students’ academic performance
- Promote collaborative efforts among secondary and postsecondary educators
- Identify effective and meaningful strategies for learning assessment
- Obtain quantifiable results to share with colleagues across settings.
